Telomere junctions along the rDNA unit in three Oscheius species
18S (green) and 28S (blue) drawn on each species' own repeat unit; height 1.0 = one junction per somatic genome
bp on the median unit (7,031 bp)

Telomere junction position on the rDNA monomer (fraction of each species' monomer; 18S start = 0)
PS2068: 109 reads (1.15 x)
DF5120: 53 reads (0.82 x)
PS1017: 59 reads (1.01 x)
>= 2 reads at position
singleton
